

Wendex Taxi

Information about the project:

The project was developed on the C++ 17 version, compiled and executed on the Windows 10 pro operating system using the Microsoft Visual C++ 2017 compiler (standard compilation key). The main file contains a script of function calls.

The class diagram is presented inside the solution

Further development of the project:

In the code, it is necessary to reduce the number of repeating blocks, unify some blocks, and revise the logic. Adding multi-threading will significantly improve the program's performance.
